# JAVIER GONZALEZ

## BACKEND DEVELOPER

### ABOUT

Skilled in developing, debugging, and deploying web applications. Experienced in working with APIs and other web services. Possesses excellent communication and problem-solving skills.

### EXPERIENCE

#### Soyhenry

Fullstack web developer | 2022

- I contributed greatly to fixing errors that arose in the final group project, among which it is worth highlighting authentication with auth0.
- Improved my soft skills in teamwork, communication, agile learning, and problem solving while in constant contact with programming.

### EDUCATION

#### SoyHenry's bootcamp

programming bootcamp |2022

- I Improved my knowledge of logical Programming skills because it taught me the basics of coding in various techs. It also gave me an understanding of the principles and logic behind coding, which has been very beneficial in my day-to-day work.

[certification](#)

#### Parlingo academy

English course | 2021-2022

- Improved my writing, reading, listening, and speaking skills.
- 90% average in exams along the course.

[certification](#)

#### Jaime Isaza Cadavid polytechnic

course software development | 2019-2020

- I was able to learn the fundamentals of Javascript and Java, such as variables, data types, control flow, functions, and objects. I was then able to apply these fundamentals in my daily tasks and projects.

[certification](#)

#### Globant

Globant web development basics |2019

- I got knowledge of HTML, CSS, and javascript.
- Studying the syntax and semantics: I'm reading through the material on the language's syntax and semantics. This includes the grammar, the built-in functions, and any special structures that the language uses.
