# JAVIER GONZALEZ

## BACKEND DEVELOPER

### ABOUT

Backend Developer with 1+ years of experience in web development and a strong understanding of JavaScript, Java, and other related technologies. Skilled in developing, debugging, and deploying web applications. Experienced in working with APIs and other web services. Possesses excellent communication and problem-solving skills.

### EDUCATION

#### SoyHenry's bootcamp

programming bootcamp | 2022

- Improved my knowledge of logical Programming skills.
- I developed applications with technologies such as React, Redux, NextJs, Node, Express, Typescript, Javascript, Prisma, SQL, etc.
- I contributed greatly to fixing errors that arose in the final group project, among which it is worth highlighting authentication with auth0.
- Through hands-on exercises, group discussions, and interactive lectures, the bootcamp provided me the skills and knowledge necessary to communicate effectively, collaborate with others, and manage my time effectively.

[certification](#)

#### Parlingo academy

English course | 2021-2022

- Improved my writing, reading, listening, and speaking skills.
- 90% average in exams along the course.

[certification](#)

#### Jaime Isaza Cadavid polytechnic

course software development | 2019-2020

- I began to work on my logical Programming skills.
- I was able to learn the fundamentals of Javascript and Java, such as variables, data types, control flow, functions, and objects. I was then able to apply these fundamentals in my daily tasks and projects.
- I attended multiple programming hotbeds.

[certification](#)

#### Globant

Globant web development basics | 2019

- I got knowledge of HTML, CSS, and javascript.
- Studying the syntax and semantics: I'm reading through the material on the language's syntax and semantics. This includes the grammar, the built-in functions, and any special structures that the language uses.
